ABOUT US

A Young Company Built on 50+ Years of Transport Experience

Founded in 2022, URL Safe Express Pvt. Ltd. has grown into a nationwide B2B surface transport network – moving goods, machinery, project cargo and industrial consignments across India, with handling services and warehousing facilities at major centres.

The company is young; the team is not. Our promoters bring **50+ years of combined experience**, shaping how we run today – structured branches, disciplined documentation, honest tracking and clear escalation ownership. We serve manufacturers, EPC and engineering firms, chemical and lubricant producers, solar projects and international freight forwarders.

We are not a booking agency. We own our fleet, operate 33+ branches, and take end-to-end responsibility for every consignment we accept.

Promoter-driven – directors are personally involved in operations, major quotations and escalations; contract clients have direct access to the leadership team.

Incorporated 2 March 2022 · CIN U63030TN2022PTC150292 ·
Registered & Corporate Office at Gee Gee Shroff Centre,
Poonamallee High Road, Chennai 600084.

Corporate Social Responsibility

We have adopted K.D.S. Public School for underprivileged children in Bhiwani, supporting quality education and a safe learning environment for children from economically weaker backgrounds.

A nationwide surface network

Own fleet, 33+ branches and daily tracking discipline – serving manufacturers, EPC firms, chemical majors and freight forwarders across India.

You're Not Buying a Truck. You're Buying What Comes With It.

Any transporter can quote a rate. The difference shows up after the order – in placement, tracking, documentation and what happens when something goes wrong.

What you need	A typical broker	URL Safe Express
Vehicle placement	Depends on market availability that day	120+ owned + 1,500 contracted vehicles, branch-coordinated placement
Tracking	"Driver is not picking up"	GPS / TMS tracking with accountable daily updates
Loading	Driver manages alone	Branch-supervised loading, lashing and photographs
Documentation	LR if you're lucky	Serial-numbered LRs, loading photos, e-way bill support, POD discipline
Problems in transit	Your problem	Nearest-branch response with a named escalation path
Compliance	Unverifiable	ISO 9001:2015, GST, MSME, ESIC, FSSAI, D-U-N-S – audit-ready
Continuity	New negotiation every load	Rate contracts, KPI reporting, monthly reviews

Backed by our operating commitments

Right vehicle, placed on time

Honest tracking updates

Safe cargo handling

Documentation discipline

Branch support on the ground

Route planning before dispatch

Escalation ownership

Responsible pricing

We built URL Safe Express to be the transport partner we would want to hire: fleet behind the commitment, branches behind the fleet, and a named person behind every problem.

Supervised loading. Documented handover.

Branch teams oversee loading, lashing and photographs – so what leaves the plant is what reaches the site.

SERVICES OVERVIEW

Surface Transport Services, End to End

Focused B2B surface transport – dedicated vehicle movements, oversized cargo, project logistics and the ground support around them.

Dedicated Full Truck Load

Single-client vehicles across all major Indian routes – no clubbing.

ODC / OWC Transportation

Over-dimensional cargo with route planning, permits and supervision.

Project Cargo

Multi-vehicle, multi-phase movements for EPC, solar and industry.

Container Movement

20 ft & 40 ft transport between ports, ICDs, plants and warehouses.

Specialised Transportation

Machinery and plant equipment needing non-standard vehicles.

Warehousing & Handling

Covered and open storage support at selected branches.

Loading & Lashing

Trained coordination for safe loading, securing and lashing.

GPS / TMS Tracking

Vehicle-level tracking with daily status updates.

Route Planning

Pre-dispatch route assessment and on-ground branch support.

Industries we serve

Automotive & Tractors

Engineering & Process Equipment

Chemicals & Lubricants

Solar & Renewables

Pharma & Healthcare

EPC & Project Cargo

Elevators & Technology

FMCG & Consumer

Global Freight Forwarders

Oil & Energy PSUs

Warehousing & handling support

Covered and open storage, transshipment and loading support at selected branch locations.

CORE SERVICES

Dedicated FTL & ODC / Project Cargo

Dedicated Full Truck Load

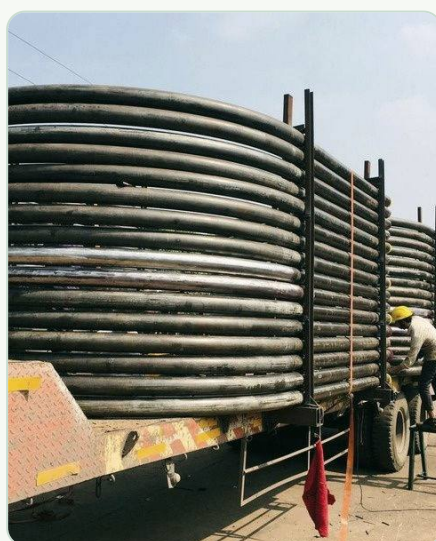

One client, one vehicle, one route. No clubbing with third-party cargo – so no intermediate handling, no transshipment damage risk, no waiting for co-loaders.

- ✓ **Confirmed placement** – type, body & capacity locked at booking; same/next-day on major routes.
- ✓ **Direct transit** – loading point straight to delivery point.
- ✓ **Daily tracking** – GPS-supported status in your format.
- ✓ **POD discipline** – proof of delivery returned with the bill.

ODC / Project Cargo

Oversized movements fail in planning, not on the road. We engineer the movement before we quote – studying cargo, route and constraints up front.

- ✓ **Cargo & route survey** – dimensions, CG, height/width/bridge constraints assessed in advance.
- ✓ **Permits & statutory coordination** – RTO and state permissions where needed.
- ✓ **Lashing, chocking & escort** – supervised securing with photo records.
- ✓ **Single-point coordination** – daily position reports between plant, site & branches.

Project cargo, ODC and heavy-machinery movements – up to trailer loads of 40+ MT.

FLEET STRENGTH

120+ Owned. 1,500 Attached. One Standard.

Owned fleet = control.

120+ company-owned vehicles give direct control over placement reliability, maintenance and driver conduct – led by 21-25 MT Taurus multi-axles and 25-30 MT trailers.

Attached fleet = reach.

1,500 vehicles on regular contract give pan-India flexibility and surge capacity – arranged at short notice on most major routes.

Category	Vehicle types	Typical use
Standard trucks	14-22 ft, open & container body	Regional FTL, plant shuttles, last-leg distribution
Long-haul	32 ft SXL / MXL container body	Line-haul FTL for FMCG, consumer & engineering goods
Trailers	40 ft flatbed & semi-low-bed	Steel, machinery, containers, project cargo
ODC equipment	Low-bed, semi-low-bed & extendable	Over-dimensional & over-weight consignments

21-25 MT Taurus: 47

25-30 MT trailers: 22

7 MT containers: 14

9-10 MT CNG/LPT: 18

3-3.5 MT LCV: 5

≤2 MT small: 5

Other (16-18 MT etc.): 8

Every vehicle tracked

GPS / TMS on owned & attached fleet · daily status updates · driver coordination · route monitoring · client reporting by WhatsApp, email or MIS.

Owned URL Safe Express vehicles and contracted fleet on active movements across India.

BRANCH NETWORK

33+ Branches. Because Trucks Don't Solve Problems – People Do.

● Branch / office location

A transport company without ground presence is just a phone number. Our own branches across India's major industrial and logistics locations mean faster placement, supervised loading and local documentation – with coverage spanning West, North, South and East India.

- ✓ **Faster vehicle placement** – local market knowledge at origin.
- ✓ **Loading coordination** – our people at the loading point.
- ✓ **Emergency response** – issues handled by the nearest branch.
- ✓ **Documentation & POD** – supported locally at both ends.
- ✓ **A named branch manager** at every location.

Our branch & facility network – connected by email, TMS and GPS, with storage and transhipment support at selected locations.

✓ Safety & HSE

- ✓ HSE policy – driver conduct, vehicle condition, cargo handling
- ✓ Driver briefing on route, cargo and site rules before dispatch
- ✓ Vehicle document verification (RC, fitness, insurance, permit)
- ✓ Supervised loading & lashing with photographic records
- ✓ Seal discipline on closed-body movements
- ✓ Accident & incident documentation, insurance coordination

✓ Documentation

- ✓ Serial-numbered quotations and LR's with written terms
- ✓ Loading photos and weighment records where required
- ✓ e-way bill coordination with consignor / consignee
- ✓ POD collection, verification and timely return
- ✓ Billing with complete supporting documents
- ✓ Balance sheets & statutory certificates for vendor registration

Document flow on every movement:

LR → Loading photos → e-way bill → Daily tracking → POD → Invoice

From RFQ to POD – and Beyond

Every movement follows the same discipline, and for regular dispatch programmes we run it as a managed annual contract.

The 10-step movement flow

- 1 RFQ received
- 2 Requirement validation
- 3 Costing & quotation
- 4 Confirmation
- 5 Vehicle placement **KEY**
- 6 Loading supervision
- 7 Tracking updates **KEY**
- 8 Delivery
- 9 POD & documentation **KEY**
- 10 Billing support

For contract clients

- ✓ **Route-wise rate planning** – lane-level rates on real costing, with agreed validity.
- ✓ **Vehicle placement planning** – aligned to your dispatch calendar, with surge support.
- ✓ **Dedicated support team** – named operations and coordination contacts.
- ✓ **Monthly KPI reporting** – placement %, transit-time, POD status and open-issue log.
- ✓ **Escalation matrix** – written path: coordinator → branch head → director.
- ✓ **Billing discipline** – consolidated cycles and POD-linked invoicing that clears your audit.

Most relationships begin with a trial lane – where we prove placement, tracking and documentation before the contract widens.

Every consignment – tracked and documented

From RFQ to POD, one discipline: confirmed placement, daily tracking, supervised loading and POD-linked billing that clears your audit.

OUR CLIENTS

Trusted by Leading Enterprises

We move cargo for reputed public and private sector enterprises – tractor and automotive OEMs, chemical and lubricant majors, solar developers, elevator manufacturers and global freight forwarders – on repeat business and annual rate contracts.

Company names and marks are the property of their respective owners, shown to indicate cargo handled and sectors served. Displayed with client association; not an endorsement.

Certificates of Excellence & Letters of Recommendation

Written commendations from enterprise clients recognising our service on regular FTL, ODC and project movements – including:

ION Exchange (India)

Kineco

Rosenberger

Tube Products of India – Murugappa

TP Solar – Tata Power Renewables

Milton Roy – Ingersoll Rand

ALF Engineering

Dalmia Cement (Bharat)

Fives Cail-KCP

Metec

Arudra Engineers

R for Rabbit

Receiving a client Certificate of Excellence.

Let's Move Your Next Consignment

Send an RFQ

Share your next FTL or ODC requirement; clear written quotation within agreed turnaround.

Discuss an annual contract

Route-wise rates, KPI reporting and dedicated support for regular dispatch programmes.

Schedule a meeting

We'll come to your plant or office with route-specific proposals.

Vendor registration

Complete documentation support for empanelment: certificates and reference letters.
